# Introduction

Saturn is the great timekeeper of astrology, its 30-year cycle slowly marking out the creation and completion of the physical form. In esoteric astrology time is said to stop at the age of thirty when Saturn completes its first cycle and turns to repeating itself. From thirty years onward it is said that we begin moving beyond the grasp of time into eternity. It is said that the first thirty years we spend building our personal space capsule, the physical body. At any rate, Saturn is a key planet to note in our birth chart.

What follows amounts to a brief overview of the first thirty years or so of your life -- a road map of the years to come. Since childhood, adolescence, and early adult life are so crucial to each of us, an attempt has been made to describe these formative years from an astrological perspective. Based on the gradual movement of the planet Saturn, this is one of the most tested of all astrological techniques. It is used by almost every professional astrologer as part of any personal consultation. Provided that your time of birth is more or less accurate, you will find this information both accurate and informative. Here is a general life overview, followed by a close-up on your current changes -- what is happening right now. First the overview:

**Robert Pattinson**

1st Saturn Cycle  
 Dates and (Age)  
 on Angles

08-29-2008 (22)

Your very early years, perhaps until the age of eleven or twelve, may not be the easiest. You may well be a more inward and insecure youngster than average. However, the early teens should see the end of this inward stage and the beginning of a much more outward and self-confident one. Around that time, you will begin to sense your own strength and discover yourself. The years following will be a time of continued learning, extending your position outwardly and socially until around the age of eighteen or nineteen, at which time you will really begin to come into your own, both in a social sense and where your career is concerned. The years from eighteen through twenty-six will be very strong, during which you can do no wrong. You should rise rapidly to a position of success. After that, you will

become more inward and turn away from the outer, a time for consolidation.

Summary: Your childhood and pre-teen years may be more inward and perhaps lack confidence. However, after that time you will become very confident as you find yourself and become involved in outwardly building a very successful life, and early – reaching a peak around the age of twenty-six years of age. After that, your attention may turn to more spiritual or inward directions.

# Saturn – Second Cycle

2nd Saturn Cycle  
 Dates and (Age)  
 on Angles

10-08-2037 (51)  
 03-25-2038 (51)  
 06-26-2038 (52)

01-30-2016 (29)  
 05-21-2016 (30)  
 10-28-2016 (30)

06-15-2031 (45)

03-11-2024 (37)

In the second Saturn cycle we are each born free from the grip of time. Our physical body is complete; we have reached our prime, sustain for a while, and then gradually decline. And although our physical body has ceased to grow, our mind continues to expand beyond those physical limits. In a very real sense, we are all born again, but this time the birth is spiritual not physical.

It is during this second Saturn cycle that we learn to control ourselves mentally (and emotionally), manage our lives, and build a career. It is during this time that we are in our majority that success in any endeavor is most possible. In the inner teachings it is said that we spend our second thirty years repairing the damage we made (without realizing it) emerging from our first

thirty years.

This second cycle of Saturn is the most opportune for physical success as all roads lead up to us from youth and away from us in old age. We stand at the crossroads, the pinnacle or prime of life and can see both ways.

**Robert Pattinson**  
 3rd Saturn Cycle  
 Dates and (Age)  
 on Angles

In this third and (for most of us) final Saturn cycle our physical form is definitely in decline but our spiritual horizons only continue to broaden. It is said in the esoteric tradition that in this cycle we can experience becoming an active part of the creative force in life itself, not just conceptually, but actually. We are able to work with those younger than we to shape and direct their activities. Although we begin to retire from the physical scene, inside we never age but are as young as we can remember.

It is during this time that any mental training, patience, and self-control really pay off. We are now very much the fruit of our own discipline and experience; it is during this time that we are very much out of the body more and more of the time. If we have no discipline we are somewhat at the mercy of the winds

of change, but whatever control and mastery we have achieved now works with and for us to complete our life. We can feel very creative and part of the creative forces that are all around us.

**Sun Conjunct Ascendant** - December 06, 2011

The date(s) (above and to the left) indicate the end of a very outward and perhaps successful period of years for you, during which you may have had an opportunity to establish yourself both in career and reputation. You may find yourself becoming less interested in the outer and social world and more interested in your own inner changes. There will be less of an impulse for recognition along with a growing sense of being by yourself and enjoying it. This coming time will be less outward and may call for a change of approach and perhaps life style.

This is not a time of outreach, not the best point to start any great projects. Instead you may wish to consolidate what you now have, pull back a bit, and prepare for a number of years of a more inward and personal nature. This will be a time of introspection, and you may find yourself letting go of plans and projects started in a more outward phase but as yet uncompleted. You may take an interest in your own psyche, religion, and spiritual ideas. This is a time to absorb and take in new impressions and information. In summary, here is a natural breaking-point in life, a time to let go of what has been occupying you for the last years and assume a new attitude.

Many people find themselves withdrawing socially and enjoying their own company. In summary: This marks a more inward period that will last 6-7 years, during which you may feel insecure and on your own. Don't expect to make great headway in the outer, social world. Bide your time and prepare for your "coming out" a few years down the road.

**Ideas of Authority**

Saturn Conjunct Sun    Transit to Natal

Your practical and organizational skills are at their clearest. Perhaps more of an internal change than one that is flashy and outward, this shift in emphasis marks your moving out of the past, out of whatever obligations and responsibilities you have to do, and onto a future of greater control and mastery on your part. In other words, you will be better able to handle things, to exert control over your own affairs, and direct your future than you have up to now. This is the beginning of a more future-oriented time.

**Saturn Return (Begin 3rd Saturn Cycle)**

Saturn Conjunct Saturn    Transit to Natal

A major life event that marks the end of a formative period and the beginning of more independence. You are on your own, and this marks the start of increased responsibility and accountability. A time for deep thought, review of self, a new chance.

This concludes your Life Landscape Report, the chronological movement of Saturn (the sequence of time) through your natal chart.

Most astrologers would agree that the 30-year cycle of Saturn through the astrological houses and specifically the “Angles,” (Ascendant, I.C., Descendant, and Midheaven) represents one of the most accurate and telling of all astrological factors.

Saturn signifies the physical form as it emerges through time after birth, reaches our “Prime,” and then begins to fade. This is usually divided into three cycles of thirty years each.

I like to think of the first thirty years, while Saturn is building our physical body and form, as the time when we each build ourselves a space capsule as well as we can, as solidly as possible – our body.

Then after the age of thirty, we are launched into outer space. Time as we knew it ends and we begin the next Saturn cycle and are born beyond time. My teacher told me that in that second cycle we each repair the damage we made during the first cycle and during the process of being launched.

And finally, in our third 30-year cycle, it was explained to me that we can consciously and actively participate in the creative life force, literally shaping life in those younger than ourselves. I hope you have enjoyed your report.
